EDUCATION

Vellore Institute Of Technology

Btech in Computer Science — CGPA: 8.38

Chennai, Tamil Nadu

July. 2024 – Present

SatyamevaJayate Int. School

XII(Science - PCM) — percentage: 79.8

Ahmedabad, Gujarat

July. 2022 – May 2024

DAV Int. School

X — percentage: 87.5

Ahmedabad, Gujarat

May 2022

EXPERIENCE

Hack-android - Hackathon

February 2026

VIT university

Chennai, Tamil Nadu

- Collaborated in an agile team environment to brainstorm, design, and develop a functional prototype within a strict 48-hour deadline
- Gained hands-on experience rapidly integrating new APIs and resolving version control (Git) workflow challenges under pressure

UX/UI Design Assistant

June 2025 – Present

Android Club - Vit University

Chennai, Tamil Nadu

- Designed comprehensive frontend wireframes and interactive high-fidelity prototypes for a trial mobile application utilizing Figma
- Collaborated with other developers to communicate visual layouts and seamlessly translate design mockups into actionable technical requirements

Hack the Gap - Hackathon

Oct. 2025

VIT university

Chennai, Tamil Nadu

- Collaborated within a team under a strict 24-hour time constraint to architect and develop “Fasal Sarthi”, a dedicated application aimed at empowering local farmers
- Researched agricultural domain challenges to iteratively design and implement user-centric software features tailored to the target audience

PROJECTS

LearnHub LMS | MongoDB, Express.js, React, Node.js, Vercel, Render

March 2026 – Present

- Engineered a robust full-stack learning management system using the MERN stack with successful cloud deployments on Vercel and Render
- Implemented optimized frontend state management and dynamic loading mechanisms (e.g., BookLoader) to dramatically improve UX during network latency
- Developed comprehensive teacher assessment modules for test management, utilizing MongoDB Atlas for reliable data persistence

Control Unit Simulator | React, Tailwind CSS, Framer Motion, Recharts

March 2026 – April 2026

- Developed a highly interactive, educational web application visualizing MIPS-style Hardwired and Microprogrammed Control Architectures
- Made a custom instruction execution timeline and generated realistic multicycle datapath animations utilizing Framer Motion
- Achieved simulation correctness through rigorous micro-operation sequences, stage signal validations, and React-based state tracking
- Integrated Recharts for dynamic visual data comparisons, assessing performance trade-offs between architectural designs

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL PLus, JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Express.js

Developer Tools: Git, VS Code, Visual Studio, PyCharm

Libraries: pandas, NumPy, Matplotlib
